Ms.
Hilde Viktoria Hagavei
Hagebyen 46
8050 Tverlandet
Norwegen

Report No.: **2211-W-74282**
Date of arrival: 19.11.2022
Date of report: 22.11.2022
Testing started: 19.11.2022
Testing completed: 22.11.2022
Status of the report: Final report

Species:	Cat
Breed:	Ragdoll
Gender:	Female
Name:	(N) Nordlaeningen's Quality Kosta Bodas Datte
Stud book No.:	(NO) NRR LO 207610
Chip No.:	578098100804291
Date of birth / Age:	14.08.2022
Type of sample:	EDTA-Blood
Date sample was taken:	07.11.2022
Sampler:	Veterinaersenteret Frauske AS
Owner / Animal-ID:	Hagavei, Hilde Viktoria
IT No. / Report-ID:	---

Cat combination Ragdoll

Parameter	Value
Name:	(N) Nordlaeningen's Quality Kosta Bodas Datte
ZB-Nummer:	(NO) NRR LO 207610
Chip-Nummer:	578098100804291
Tattoo-Nummer:	---

Hypertrophic cardiomyopathy (HCM1) Maine Coon - PCR

Result: Genotype N/N

Interpretation: The examined animal is homozygous for the wildtype-allele. It does not carry the causative mutation for Hypertrophic Cardiomyopathy in the MYBPC3-gene (A31P).

Trait of inheritance: autosomal-dominant

Scientific studies found correlation between the mutation and symptoms of the disease in the following breeds: Maine Coon and related breeds

Hypertrophic Cardiomyopathy (HCM3) Ragdoll - PCR

Result: Genotype N/N

Interpretation: The examined animal is homozygous for the wildtype-allele. It does not carry the causative mutation for Hypertrophic Cardiomyopathy in the MYBPC3-gene (R820W).

Trait of inheritance: autosomal-dominant

Scientific studies found correlation between the mutation and symptoms of the disease in the following breeds: Ragdoll and related breeds

Result: Genotype N/N

Interpretation: The examined animal is homozygous for the wildtype-allele. It does not carry the causative mutation for Polycystic Kidney Disease in the PKD1-gene.

Trait of inheritance: autosomal-dominant

Progressive Retinal Atrophy (pd-PRA) - PCR

Result: Genotype N/N

Interpretation: The examined animal is homozygous for the wildtype-allele. It does not carry the causal mutation for pd-PRA.

Trait of inheritance: autosomal recessive

Scientific studies found correlation between the mutation and symptoms of the disease in the following breeds: Persian and related

The current result is only valid for the sample submitted to our laboratory. The sender is responsible for the correct information regarding the sample material. The laboratory can not be made liable. Furthermore, any obligation for compensation is limited to the value of the tests performed.

There is a possibility that other mutations may have caused the disease/phenotype. The analysis was performed according to the latest knowledge and technology.

The laboratory is accredited for the performed tests according to DIN EN ISO/IEC 17025:2018. (except partner lab tests).

Genetic blood group determination

Parameter	Value
Name:	(N) Nordlaeningen's Quality Kosta Bodas Datte
ZB-Nummer:	(NO) NRR LO 207610
Chip-Nummer:	578098100804291
Tattoo-Nummer:	---

Result: Genotype N/N

Interpretation: The examined animal is homozygous for the N allele. It does not carry the causative genetic variant found in correlation with the serologic blood group B and AB (C) so far.

The test detects the genetic variants of the alleles b and c. Allelic series: N>c>b

Scientific studies found correlation between the allele c and the serologic blood group AB (C) exclusively for Ragdoll cats.

Breeding club discounts were granted for discountable services!

Sampling:

The following impartial person (veterinarian, breed warden, or similar) signed the form for the sampling and identity check of the animal:
